

DARLOW LLOYD & SONS

Part of the Darlow Lloyd Group Ltd

CABLE AND TRENCHING SERVICES

FOR PIPELINES, CABLES & DRAINAGE WORKS

www.dlsons.co.uk

Darlow Lloyd and Sons Ltd can provide HV, LV and all service cabling, trenching and drainage to DNO's and other similar customers for a range of environments and locations, rural and urban throughout the UK. Our teams are fully qualified to perform both agricultural and street works projects.

Tractor Mounted Chain Trencher

Our tractor mounted chain trencher provides clean, uniform and consistent trenching in all soil types. It is equipped to work in clay, sandy loam and stony soil and incorporates laser control for accurate pipe laying.

We are able to excavate land drainage, lay piping and backfill with aggregate in one pass using this machine.

Neat and economical high speed trenching, up to ten times faster than an excavator

Digging width from 125mm to 400mm

Maximum digging depth 1.2 metres

Excavated soil can be left in windrow or conveyed directly to trailer/dumper

Can be fitted with extra heavy digging chain with bullet teeth for very stony soil conditions

Able to lay cable, duct or pipework in one pass operation

Depth control via laser

Can be fitted with buried service detector

Darlow Lloyd & Sons can also offer pipe laying using a vibratory mole plough for minimal ground disturbance.
